

ROCOL Track & Rail Lube

Reduce track delays

ROCOL track & rail lube spray is specifically designed for greatly extending lubrication intervals on Network Rail switch plate/slide chair mechanisms (Network Rail Certificate of Acceptance PA05/092)

In site trial studies, Rocol track & rail lube spray proved up to six times more effective than the competition.

ROCOL track & rail lube spray is formulated from a unique blend of corrosion inhibitors which provide excellent long-term corrosion resistance in all extremes of weather. Extreme pressure and anti-wear additives combine to significantly reduce friction and wear.

Outstanding Features

- Outstanding corrosion protection in all extremes of weather
- Significantly reduced friction and wear
- Specifically designed applicator for ease of use
- Substantially reduced number of applications required
- Significantly reduced delays and rail repairs resulting from slide chair seizure
- Dramatically improved productivity and easy application

Also available

- Hand-held applicators for overhead and less accessible applications (Cat Nos 39/000041 and 39/000042)
- Rocol autolube systems for automatic lubrication of level crossings, greatly extending lubrication intervals

ROCOL Clamp Lock Spray

The original and still the best

ROCOL track & rail lube spray is specifically designed for greatly extending lubrication intervals on Railtrack switch plate/slide chair mechanisms.

(Network Rail Certificate of Acceptance PA05/092)

Sample the quality at a special price

- Rocol clamp lock spray exhibits fast effective penetration to all moving parts, providing outstanding corrosion protection in all extremes of weather and significantly reducing friction and wear
- In recent competitive testing, Rocol clamp lock spray out-performed its main competitor on tests specified in BR652
- Rocol clamp lock spray is fitted with a 360 degree valve and can be sprayed from any angle - even upside down
- Rocol clamp lock spray has the optimum propellant content and valve to ensure complete evacuation of the can - whatever the spraying angle - so no product is wasted

Cat No 0086/032250
