

Location Case Internal Fittings

Fully conformant to Network Rail specifications

- Conforms to Network Rail specification BRS-SM 440 and BS 6945
- All components incorporate anti-vibration protection
- Fully modular for all types of equipment
- Fits all location cases

All Unipart Rail location case internal fittings are fully modular to enable the mounting of all types of equipment.

Anti-vibration components ensure that fittings remain secure.

Slotted upright channel - B1
Cat N° 086/043580

Location Case Upright Bar
Cat N° 086/009995

GMT Anti-vibration Double Protection Enhancement[®]

This upgraded system uses an approved pre-applied locking and sealing solution, which protects the tightened assembly against loss of pre-tension through even extreme vibration without degrading the high tensile bolt.

There is no outgassing from the inner acrylic copolymer. The solution has been proven in industrial, automotive and aerospace applications and well exceeds the performance of our previously approved system.

During assembly, both the male and female threads are coated giving double protection to the system.

- Does not degrade the strength of the stainless steel high tensile bolts
- Easily observed, even after the assembly is fully fitted and the anti-vibration system is in place
- Easily exceeds the requirements of Railtrack's previously approved system
- Can be re-used
