

EVA Rail Pad

Specifically designed for use with all Corus Rail Type 400 steel sleepers and other non-Fastclip sleepers

Railtrack Certificate: PA05/870
Cat N° 57/048471

Designed as a replacement for the 5.5 mm 'H' EVA rail pad, this pad can be used in all situations where Cat N° 57/048521 was previously used on steel or concrete sleepers

The pad **MUST** be used on all Corus Rail Type 400 steel sleepers.

- Improved electrical resistance
- Chamfered edge on underside to fit the weld in the rail seat area
- To be used as a replacement for 57/048521
- Differentiated from its predecessor by production in colour green (rather than black)
- The pad must be fitted with the chamfered edge facing the surface of the steel sleeper. To help with this, the underside of the pad is clearly labelled 'bottom'
