

# Track Circuit Clips

Used in conjunction with TCOD, track circuit clips protect failed trains/units in order to turn signals to danger.

- Two types are stocked by Unipart Rail – Cat N° 870/23401 and 870/23402
- 870/23401 is bound so that the clips are side by side, ideal for mounting in rail and road rail vehicle cabs on a wooden block.
- For a more compact version, 870/23402 is available where the clips are bound back to back
- Track circuit clips are used to protect failed trains/units in order to turn signals to danger. This may be needed when a train is derailed and obstructing an adjacent track
- Network Rail Rule Book Supplementary N° 9 now requires track circuit clips to be part of the 'Look-out' kit
