

# LED Junction Route Indicator and Light Meter

Network Rail Product Acceptance N° PA05/01411 (Modules)  
Network Rail Product Acceptance N° PA05/01755 (Housing)

LEDs in signalling are set to become the industry standard

- HMRI Certificate of Approval PR128732
- Housing compliant with BRS-SE 152
- LED aspects are sealed modules to IP65
- Fully interchangeable with existing filament lit units
- Hinged assembly to enable easy cleaning and maintenance from a place of safety
- Unique optical arrangement to reduce the possibility of a signal phantom
- Constant light output throughout the life of the signal
- Increased infrastructure reliability and staff safety
- LED light sources give a long and predictable service life
- Not affected by variations in supply voltage
- Greatly reduced maintenance costs
- Compatible with existing SSI and RRI installations
- Nominal supply voltage of 110V ac

Light Meter for Junction  
Route Indicators now  
available –  
Cat N° 0086/009922
