

RADIO SYSTEMS

The Unipart Rail radio section at Crewe manufactures, services and repairs a wide range of radios both NRN and Cab Secure. This service is designed to cover current systems as well as systems which are no longer available as new, ensuring that radios continue to provide a reliable service to the industry.

The information on this page covers the main radio systems covered by Unipart Rail, but as Unipart Rail Service Engineers have extensive knowledge, we can provide a service across a wider range to your requirements.

Contact 01270 847645 for further information on the Unipart Rail service.

NRN Radios

Service and Repair

NRN Radio versions 8 & 9 and Control Heads version 8 are now obsolete and existing units are serviced and repaired using the following numbers:

Unipart Rail Radio Section

The Unipart Rail Radio Section is fully Network Rail approved for the maintenance and repair of radios and radio systems. The extensive experience of Unipart Rail means that equipment can be returned to an 'as new' condition, ensuring continued cover for the network's systems.

The Unipart Rail Radio Section at Crewe forms just part of the Unipart Rail Service Centres which offer a manufacturing, servicing and repair facility to the rail industry.
