

Aqua-Zorb

from Unipart Rail

A simple method of removing water from fuel tanks

The absorbent within the sheath removes water from the bottom of diesel tanks to improve fuel quality

Available in a wide range of sizes suitable for storage tanks and vehicle's tanks

Fabric sheath contains the water filled absorbent for easy removal and disposal

Proven extensively within the haulage and agriculture industries

Cost effective solution without the need to drain fuel tanks

UNIPART

SERVING THE WORLD'S RAILWAYS

The Aqua-Zorb water-free cell is a simple and effective means of removing water from the bottom of diesel fuel tanks. By using the fabric sheath containing a water absorbing formula, the Aqua-Zorb product eliminates the need for draining fuel tanks to remove water. The cells can be easily be replaced to constantly provide a method of maintaining the integrity of the fuel whether it is in a storage tank or on a vehicle.

The water content of diesel naturally falls to the bottom of a tank and can create a breeding area for bugs that impact on the quality of the diesel. Traditionally, water is removed by draining it off at the base of the fuel tank with the associated health and safety and disposal issues. Aqua-Zorb eliminates the need for the draining of a fuel tank and the expanded sheath, which contains the water, can be disposed of using conventional waste collection services as there is no diesel contained in the formula.

The Aqua-Zorb fabric sheath is dropped into a tank and the weight of the steel rod product positions it at the bottom of the vessel. The hydrophilic formula inside the sheath only absorbs water and swells up to hold the waste liquid. The sheath can be removed using the attached cord to inspect the level of absorption, and can be replaced if necessary with a new Aqua-Zorb cell.

Widely used in the haulage and agricultural industries, Aqua-Zorb is a reliable and safe means of maintaining the condition of stored fuel. Product tests have shown no leakage of the water from the expanded sheath, no contamination of the fuel from the product and no issues relating to removal and replacement of the product in the storage tank.

Available sizes include:

Part No.	Catalogue No.	Size
AZ214	0007/500176	2in x 14in Cell
AZ2514	0007/500177	2.5in x 14in Cell
AZ314	0007/500178	3.0in x 14in Cell
AZ414	0007/500179	4in x 14in Cell
AZ614	0007/500180	6in x 14in Cell
AZ232	0007/500181	2in x 32in Cell
AZ2532	0007/500182	2.5in x 32in Cell
AZ332	0007/500186	3in x 32in Cell
AZ432	0007/500187	4in x 32in Cell
AZ632	0007/500188	6in x 32in Cell
AZI232	0007/500189	12in x 32in Cell*
AZI4SSTR	0007/500190	Stainless Steel Tank Rod with Clips (for 14in Cells)
AZ32SSTR	0007/500191	Stainless Steel Tank Rod with Clips (for 32in Cells)

*Suitable for fuel tanks over 10,000 litres
