Reduces wiper judder

Helps prevent legionella bacteria

UNIPART
RAIL

SERVING THE WORLD'S RAILWAYS

A British innovation, Cclear uses the advancement of nano surface technology. A layer of nano particles are formed creating a barrier that repels rain, sleet and snow. The particles only bond to exposed areas of the glass and not to themselves so there is no build up.

Features:

- Night-time vision is greatly enhanced
- Suffer less stress when driving in torrential rain, sleet or snow
- Effects of spray from passing vehicles is greatly reduced
- Bugs and traffic grime is less likely to adhere to the screen
- No streaking or smearing, just crystal clear throughout the year
- Ready to use formula 20 litres or an IBC
