

# Kwik-Step Access

Easy-installation Stairways, Platforms, Walkways & Refuges

Stairways for all gradients and profiles

Platforms for underpass access

Walkways, refuges and lookout posts

# Why waste money on costly civils?

Building walkways, platforms and stairways in railway environments is a costly business. But with Kwik-Step solutions from Unipart Rail, costs can be reduced by up to 28% and man-days by up to 80%.

- Stairways designed to your embankment or slope specific gradient and land profiles
- All materials required supplied as an installation kit, including handrails and landings
- Installation guide showing position of all kit
- All modular materials are lightweight and easily handled
- Temporary or permanent installations
- No foundations, minimum groundwork

**28%** Possible costs savings<sup>1</sup>

**80%** Possible man-day savings<sup>1</sup>

“It’s ingenious. I would never have thought it could be installed so quickly. We have done 9 so far and we keep on thinking of new locations where we can use it. It saves us time and money – and it’s a major contribution to site safety.”

Dave Milbourn, Works & Off-Track Manager,  
Balfour Beatty

## Modular Platforms

Supplied in 2.5m x 1.25m modules

To maximise bridge inspection and maintenance opportunities, easy access is essential. Kwik-Step modular platforms can be included in the original design or retro fitted to existing structures to provide a safe, secure and economic solution contributing to reductions in safety risk, access equipment hire, line closure and associated network disruption.

<sup>1</sup> Figures based on labour, plant and material costs for installation of 4 platforms (as in photo) at A1(M), Junction 7 in the UK.

### **Modular Cess Walkways**

**Lightweight GRP Composite Supplied in 2.5m x 1.0m modules**  
Providing safe access to the lineside, creating a continuous walkway of any length, a place of safety and improving access for inspection and maintenance.

### **Refuges and Lookout Posts**

**Lightweight GRP Composite Sub-Frame and Handrails**  
Providing a safe location at the lineside for inspection and maintenance, Kwik-Step Refuges and Lookout Posts can be installed on embankments with ground bearing pads or adjustable frame supports. Supplied 'flat-packed', every component can be manually handled safely and assembled on site with hand tools.

### **Modular Stairways**

The Standard modules of galvanized steel tread plate are pinned directly into the slope, minimising groundwork and avoiding the need for foundations. Modules of 2, 3 and 4 steps are combined to make up the required length of flight and are available in a wide range of gradients from 12° to 45°. The modules can be installed side-by-side to provide a double-width stairway if required.

## About Unipart

The Unipart Group is a leading UK manufacturer, full service logistics provider and consultant in operational excellence. Operating across a range of market sectors, including automotive, manufacturing, mobile telecoms, rail, retail and technology, Unipart offers a breadth of services to a wide range of blue chip clients internationally.
