

LED Mk3 Portable Tail Lamp

Improving the rearward visibility of your rolling stock

Features & Benefits of Unipart Dorman's LED MK3 Portable Tail Lamps

- High reliability LEDs
- High impact resistant polycarbonate lens and one piece body moulding
- Robust rotary switch incorporating a solid state optical switch with no moving contact parts at the rear of the lamp
- Retro-reflective red panel
- The battery life is approximately 10,000 hours (over 1 Year) of continuous use when fitted with two 50Ahr Air Alkaline batteries

- Supplied with two 50Ahr Air Alkaline batteries
- The battery condition is constantly monitored and the fitness for use is indicated on both sides of the lamp
- All electronic components are sealed to IP65
- Integral bracket for mounting on a standard UK lamp iron
- Bespoke wagon coupling mounting brackets (pad lockable)
- Versions available in either flashing or steady variants
- The flashing variants all flash at a rate of 120 flashes per minute
