

Locomotive Support Solutions

A full **Supply Chain Management** service for locomotive operators

Innovative Solutions to improve operational and business performance

High quality, industry compliant product solutions

SERVING THE WORLD'S RAILWAYS

Supporting Competitive Challenges For Locomotive Operators

Locomotives operate in a highly competitive market. Rolling stock performance, depot and maintenance operations all impact significantly on revenues and profits as well as the ability to deliver competitive transport services.

Unipart Rail's understanding of the rail industry, rolling stock, the products, technology and supporting supply chain is second to none. We are experienced in keeping Locomotive Operators trains running and recognise the challenges faced by operators in terms of safety, ensuring fleet availability and maximising fleet utilisation, managing and reducing operational costs and growing revenues and maintaining profitability.

The service we provide is underpinned by significant investment in processes, systems and a team specialising in new product development, customer service, supplier management and engineering.

Why work with Unipart Rail

- Improved availability of parts
- Lean operations and a more efficient supply chain for maintenance operations
- Products/parts supported by safety and quality assurance processes, technical support & warranty
- Innovation in technology and processes that improves operational and business performance
- Innovative solutions that can help meet the challenges around cost, capacity, customers and carbon

Our Value Added Services

As part of our service, we provide a full range of Asset Management and Supply Chain Solutions including repair and overhaul services, obsolescence management and Condition Based Maintenance technology, to reduce maintenance costs and improve train availability.

Product Innovation

Obsolescence Management

Supply Chain Operations

Condition Based Maintenance

SmartServe

A full supply chain management solution

Our locomotive support solution provides operators with a full supply chain management service, incorporating product supply, engineering capability and innovation. Benefits achieved include reduced whole life cost savings through a single source supply, reduced lead times and lower cost.

Our dedicated engineering team ensures supplied products are safe and meet industry standards and requirements and our continual innovation and investment in people and systems sees us lead in the development of the Condition Based Supply Chain to deliver fleet management efficiencies.

Our solution meets operators requirements

- Product Supply
- Asset Management
- Inventory Management
- Float Management
- Engineering Support
- Repair and Rotable Management
- Condition Based Maintenance
- Obsolescence Management
- Repair and Overhaul
- Localisation Services
- Optimised Delivery of Materials
- Warranty and Reliability Management

Utilising both a consultative and technical approach, we will provide operators with a centralised solution to improve maintenance and supply chain efficiency within their operations.

Leveraging a global manufacturing and supply network which caters for over 70,000 products, we can reduce lead times on Locomotive part supply and provide a centralised inventory facility for equipment requirements.

High quality, industry compliant rail products, delivered where you need them when you need them and in the format required.
