

Consumables and Fasteners

from Unipart Rail

A complete solution incorporating Products and Supply Chain Management services

- Full traceability of Components from Manufacture to Delivery
- Flexible Kitting solutions
- Vending Machine Technology
- Site Surveys and Diagnostic Services
- Vendor Managed Inventory Solutions
- Engineering & Obsolescence Management
- On-site Support Services and Solutions

UNIPART
RAIL

SERVING THE WORLD'S RAILWAYS

The Consumables and Fasteners Solution from Unipart Rail encompasses both Products and Supply Chain Services.

Our extended Service solutions take the risk out of a complex Supply Chain through the delivery of a core range of efficiencies which deliver benefits directly for our customers.

Our experience of working collaboratively with suppliers and customers enables us to get the right product to the right place at the right time. We can supply thousands of products across the UK as well as internationally.

The acquisition of Key Fasteners has enabled us to strengthen our capabilities and further develop our consumables and fasteners solution, therefore expanding our service offering to customers.

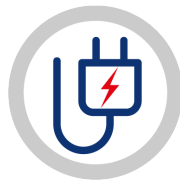

Our Product range covers:

Fasteners

Tools

Electrical

Personal Protection

Signs & Labels

Grease & Oil

Adhesives

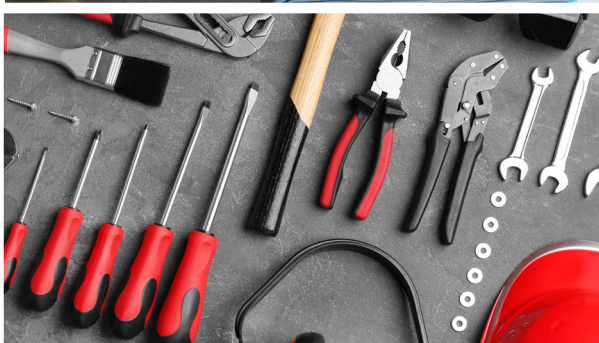

Antifreeze

Paints

Janitorial Products

Our Supply Chain Services

Fully Traceable Components

All products are fully traceable to source of supply and our processes are audited by several customers to a safety critical level.

When combined with state of the art cloud based vending machines, real time traceability from steel mill to vehicle of the components to each member of the production teams is possible.

Vending Machine Technology

High Technology vending machines which store, monitor and dispense fasteners and consumables to individual team members which is a significant benefit to customers. The combination of our quality control and supply chain processes and the innovative vending cabinets with cloud based software, provide a unique service that provides tangible efficiency improvements.

Free Site Survey

We offer a free site survey and product identification service together with a supply chain review to assess any procurement issues and propose resolutions to these.

Bar Coded Stock Bins

Traditional supply methods where consumables are stored in bar coded stock cabinets and fasteners in bin systems can be provided.

On-site Support

Unipart Rail has a team of site support staff who deliver and stock manage the components on behalf of the customer using Kanbans and line-side stock bins. Regular reviews with the customer's procurement and technical teams can identify better value or improved performance products to ensure the best combination of components are supplied.

Kitting of Parts

We specialise in kitting solutions where a mix of fasteners and consumables can be supplied in one kit. Sub-assemblies of parts can also be supplied as kits. This reduces the time spent by your employees in procurement, stores and assembly. By working closely with our customers to provide tailor made solutions, the amount of operational downtime is minimised, as is the risk of overstocking.

High Value Item Management

Innovative vending solutions allow management of high value items where the cabinet can be programmed to send an e-mail to a supervisor when an item has not been returned within a specific timescale, detailing who last took the item from the vending machine.

This system also works well with calibrated tools as the cabinet software can set the number of hours before recalibration is required, eliminating the need for separate paper records.

About Unipart

The Unipart Group is a leading UK manufacturer, full service logistics provider and consultant in operational excellence. Operating across a range of market sectors, including automotive, manufacturing, mobile telecoms, rail, retail and technology, Unipart offers a breadth of services to a wide range of blue chip clients internationally.

A wide range of our consumables and fasteners can now be ordered online for Next Day Delivery via our new E-Commerce website Unipart Rail Store.
